**CARD SENTRY
Fraud Detection Tool**

To minimize card fraud risk, the FIRST NATIONAL BANK OF PANA uses CSI Card Sentry service to monitor authorization activity and transactions that are "outside the norm" of a card holder's usage trend. If a transaction is made that is outside the norm of regular use, you may receive a phone call from the CSI processing company, confirming authorization validity. Card usage could be blocked if transactions are outside normal activity. The best way to avoid this is to let the bank know of any large or unusual purchases you plan to make with your card, and to let us know ahead of time when you will be traveling outside the state including all foreign travel.
